

MOHAMMAD AMIN MOQADAM

PROFILE

I am Mohammad Amin Moqadam, a passionate and detail-oriented Front-End Web Developer with hands-on experience in JavaScript (ES6+), React.js, and JSS. I have contributed to developing responsive web and TV applications at Namava, collaborating with cross-functional teams using Figma, Jira, and Agile workflows. I am also experienced in E2E testing with Cypress, ensuring performance and reliability across projects. I thrive in dynamic, team-oriented environments and am eager to continue growing my technical expertise while contributing to impactful and user-focused products.

EXPERIENCE

NAMAVA (SHATEL)

- Built and maintained responsive web and TV applications at Namava using React.js, JavaScript, and JSS. Worked closely with designers in Figma to deliver high-quality user interfaces, implemented E2E testing with Cypress, and collaborated in an Agile team using Jira to improve teamwork and front-end scalability.

University Questionnaire Creation Project

- Contributed to the development of a university questionnaire creation website, focusing on building the front end using React. The platform enables dynamic questionnaire creation and user interaction, with the back end developed in C#

Blog Management Project

- Developed a blog management system where users can create profiles and add blogs, with profiles displayed alongside each blog post. Implemented user authentication and profile management using HTML, CSS, JavaScript, React JS, and Git.

Personal Projects

- Designed and developed several personal projects to enhance programming and design skills.

CAREER OBJECTIVE

My goal in web development is to continuously grow and expand my knowledge in this field. I am looking for opportunities to collaborate with a professional and innovative team where I can enhance my skills, take on challenging projects, and contribute to meaningful results. I am passionate about learning, problem-solving, and ongoing professional development in a supportive and growth-oriented environment.
